

COSI BO Table

COSI is a table in steel and mahogany with a simple design and clean lines. Provides an appealing spot in urban environments. It can be used, for example, in parks, residential areas, communal outdoor areas and outside institutions.

The timeless design is backed up by the long useful life of the materials. The set is robust, durable and maintenance-free.

The table and bench set is part of the COSI range, which also includes a park bench with backrest, a bench with 2/3 backrest and benches for wall mounting and concrete bases.

The table is 2000 mm long and is installed by simply placing it on the ground, surface mounted.

Hot items can be placed directly on the table for communal dining. The choice of materials also makes COSI robust and vandal-proof for use in urban settings.

The large corten-steel surfaces are rust-red in colour and require no maintenance. Corten steel is an alloy that is designed to rust on the surface. The rusting process ceases after a few months of exposure to wind and weather. This outermost layer subsequently keeps out moisture, salt, etc.

The set is also available in hot-dip galvanised steel or powder-coated, hot-dip galvanised steel. The table top will then be in stainless steel or powder-coated, stainless steel.

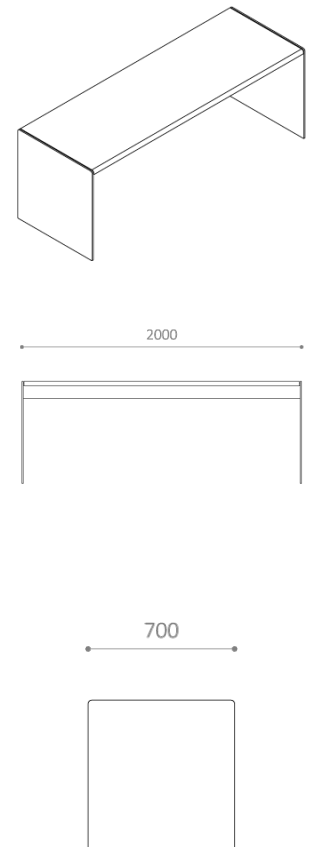

Materials

Frame: Hot-dip galvanised steel; Powder Coated Hot-dip galvanised steel; Corten

Seat: Untreated FSC®-certified mahogany

Dimensions

B: 2000 mm
W: 700 mm
H: 725 mm
