

## TERÄS LO BO Lounge Table

The TERÄS lounge table is designed for green areas in parks and terraces. It can stand up to the rigours of outdoor life, such as rain and sea air, and public use by large numbers of people. Can also be used indoors, where it adds character to the interior with its simple, well-planned design and attractive colours.

The design lends itself to evocative colours, and this range of metal furniture is available in any RAL colour. The lounge table and chair are sold separately, so colours can be combined as you choose.

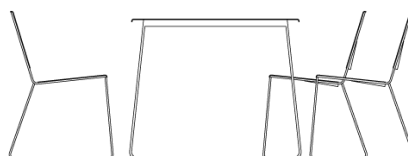

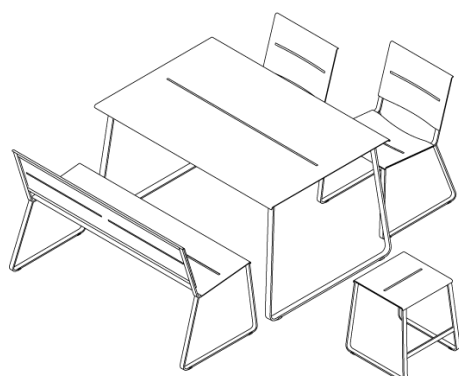

The frame is made of hot-dip galvanised steel and the table top in aluminium. The legs form runners and will therefore not sink into any soft surface, such as grass. The lounge furniture is a reasonable weight and so is not susceptible to being blown over by the wind or easy to walk off with.

Like the rest of the TERÄS range, the lounge chair is characterised by a modern, Nordic look and elegant details such as the decorative slit in the back and seat.

### Materials

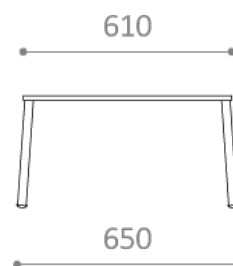

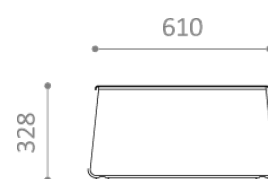

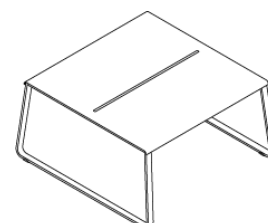

Frame: Powder-coated, hot-dip galvanised steel

Seat: Powder-coated, aluminium

### Dimensions

L: 610 mm  
W: 610 mm  
H: 328 mm  
Weight: 11 kg
