

Torres Area Light

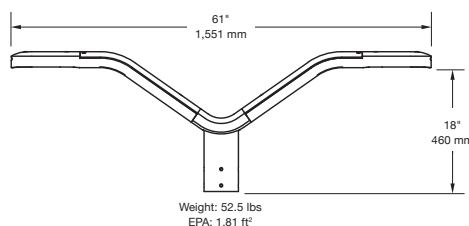

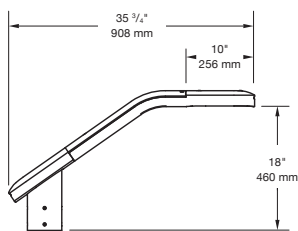

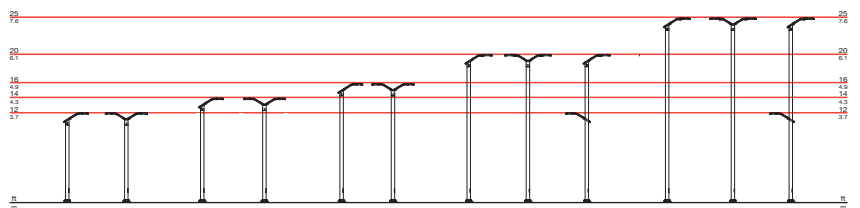

Torres lights are a beautiful complement to urban landscapes, plus traditional and contemporary architecture, improving, but not altering, the composition. The advanced LED array and optic design provides warm white light with superior visibility, high colour rendering, minimal glare, and no uplighting. Area lights are available in two sizes, in single, dual and staggered configurations, and with variations in pole heights from 3.6 metres up to 7.6 metres approximately. Torres lights are manufactured from cast aluminium and are offered in a full colour palette, finished with Landscape Forms proprietary Pangard II HAPS, VOC, and lead-free polyester powdercoat.

Specification:

Materials - cast aluminium

Finish - polyester powdercoat

Fixing - surface mounted

Dimensions

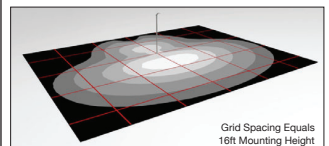

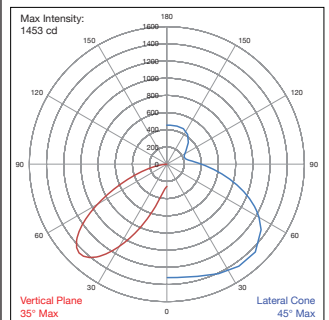

H: 3.7 / 4.3 / 4.9 / 6.1 / 7.6 m

Light Output
(Lumens): 2724/4798

Watts: 38.2/63.2

Lumens Per Watt
(Efficacy): 71.5/76

Colour Accuracy: 81
