

Cica

Rectangular cigarette bin manufactured from hot-galvanised steel tube, polyester powder coated. Standing at 907mm in height with 300x200mm base plate and upper 230mm high, electro-polished stainless-steel tube upper terminal. The upper part has a slot that enables you via a perforated plate to put out and introduce cigarettes in the lower part. Inside this there is a circular container that can be extracted through a front panel with a triangular key lock. The connection of the two types of tube is mechanical with the characteristic of having invisible screws. It is fixed to the ground with special steel wall plugs (not included). All screws are stainless steel. Pre-drilled for anchors. Can be installed outdoors or indoors.

Dimensions

H: 1150mm
W: 300mm
D: 200mm
